

Business

Are you interested in being an accountant? Secretary? If so the business curriculum is for you! You can learn word processing, general office skills and a variety of software applications.

Miss Peacock gets her students motivated by making things as realistic as possible. During the year Miss Peacock's lab class has a work experience program where you can go to work in Greencastle, Roachdale or Bainbridge, for hours each day for four weeks in a real business.

Resources

Are you having troubles with your classes? Do you not understand what is being taught?

Resources helps you improve mostly on your language and math skills; they also help develop good work habits and study skills. "The students receive passing grades," replies Mr. Roberts, the resources teacher. You can also be helped with homework in other classes. In the language arts you are helped with vocabulary, grammar, literature, and communications.
