

# Math

by Crystal Mudgett

"How is algebra ever going to benefit me in the future?" inquired Jennifer Moore. Math benefits students in more ways than one can imagine. The study of mathematics provides a strong background for routine daily tasks such as grocery shopping, making exact change, building houses, and even figuring how many miles per gallon your car gets. There are numerous other ways we benefit from our math education. A strong math background provides students with an advantage in any field they eventually decide to go into, be it professional, athletic, or even home oriented.

Senior David Roberts works hard on his trigonometry homework.

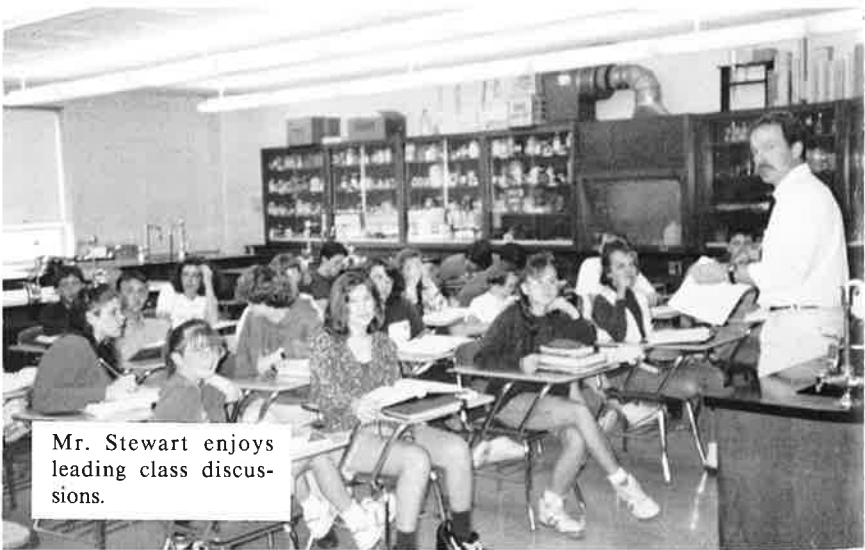

Calculus Class takes a moment away from their studies to pose for a picture.

Senior Mary Rutherford learns her trigonometry through osmosis.

Rick Hunt poses for a picture.

Mr. Stewart enjoys leading class discussions.
