

# Area 30

Students attend Area 30 to get a hands-on experience for a career that they would like to do after high school. There are many different types of classes that you can take that deal with your interests. Building Trades, Culinary Arts, Automotive, Auto Collision Repair, and Web Design are just a few of the courses offered. They also have the ICE program. ICE is actually an on-the-job learning experience that you get paid for.

Logan McMurtry staples a roof to the porch of a house for Area 30.

Dara Elisman stops to pose for the camera.

Justin Ensor looks very happy as he works on a house.

JT Francies works really hard on remodeling a house.
